Executive Summary

Lunarbits Project is a memecoin built on the Bitcoin Ordinals Runes protocol. The project has inscribed 222 million tokens with plans to introduce several utilities. As part of its first phase, Lunarbits aims to integrate a payment gateway on WooCommerce and others for accepting its tokens. Future development, including the introduction of a Decentralized Autonomous Organization (DAO) by 2025, will further decentralize and strengthen the community's governance.

Lunarbits represents a forward-thinking cryptocurrency initiative, leveraging Bitcoin's robust and secure infrastructure while pushing the boundaries of digital assets with innovative memecoin functionality and integration.

Bitcoin Runes Protocol

The Bitcoin Runes protocol allows users to create, transfer, and manage assets directly on the Bitcoin network using Ordinal inscriptions. This reduces the need for alternative blockchains, offering greater security and decentralization. Additionally, it minimizes the on-chain footprint, lowering transaction costs and improving efficiency within the Bitcoin ecosystem.

Token Creation:

Runes allows direct token creation and management on the Bitcoin network using Ordinal inscriptions.

Security and Decentralization:

It leverages Bitcoin's infrastructure for enhanced security and decentralization without external chains.

Lower Costs:

By minimizing on-chain data, Runes reduces transaction costs and improves efficiency.

Tokenomics

MEMECOIN ALLOCATION

Lunarbits has a total supply of 222,222,222 tokens, which is approximately 222 million. The distribution of these tokens is carefully planned to support various aspects of the project's growth and sustainability:

Treasury Reserved

75% (167.11 million tokens) for future rewards, private sales, and staking to support long-term growth.

Strategic Partners/Advisory

8.8% (19.55 million tokens) to incentivize long-term support and guidance.

Liquidity Allocation

5% (11.11 million tokens) to ensure smooth trading and market stability.

Initial Offering

10% (22.22 million tokens) to maximize fundraising in the first year.

Private Sale

1% (2.22 million tokens) for early investors to provide initial funding.

Tokenomics

MEMECOIN ALLOCATION

Lunarbits has inscribed 222 million tokens with planned utilities to boost value, support transactions, engage the community, and provide incentives for project growth.

RECIPIENT	PERCENTAGE	TOKENS
Strategic Partners/Advisors Years 1-10	8.8%	19.55 Million
Private Sale- Year 1	1 %	2.22 million
Liquidity Allocation	5%	11.11 million
Initial offering - Year 1 Maxi Raise	10%	22.22 million
Treasury Reserved Future Rewards, Private Sales and Staking-Years 2-10	75%	167.11million
Total	100%	222,222,222

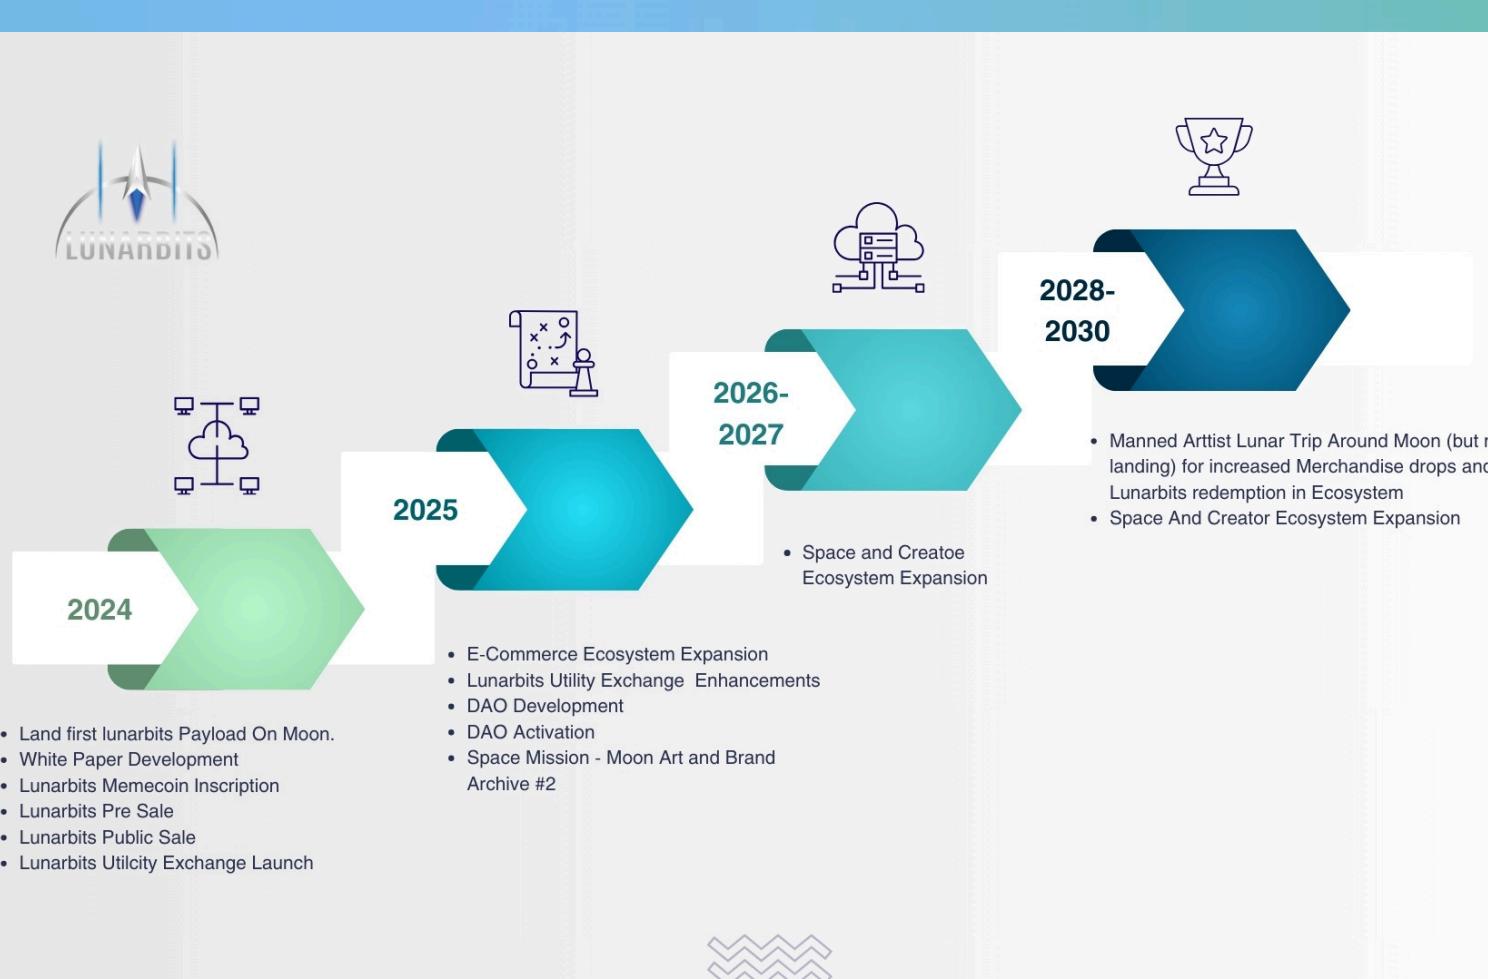

Total = 222,222,222 Tokens

LUNARBITS ROADMAP

2024-2030

In 2024, Lunarbits will launch its token, pre-sale, public sale, and utility exchange. In 2025, we'll expand e-commerce, enhance the utility exchange, and activate the DAO, plus launch Moon Art Archive #2. From 2026-2027, we'll focus on space and creator ecosystem growth. By 2028-2030, we'll undertake a lunar trip for merchandise and ecosystem expansion.

Lunarbits and Space Missions

ACQUIRE-EARN-EXPERIENCE

Lunarbits made their debut on the SpaceX Falcon 9 during the private Lunaprise Mission, curated by Space Blue. This historic launch marked the first Bitcoin Ordinal Runes token rewards to reach space. As part of this groundbreaking initiative, Lunarbits will be inscribed as Bitcoin Ordinals, serving as exclusive rewards for the Space Blue artist ecosystem, celebrating the fusion of digital assets with space exploration.

LUNARBITS ECOSYSTEM

ACQUIRE-EARN-EXPERIENCE

Trading and Storage

- **Public Exchanges (CEX & DEX):**
Trade Lunarbits tokens on centralized and decentralized exchanges.
- **Wallets/Marketplaces:**
Store and trade tokens across various wallets and marketplaces.
- **E-Commerce Partners:**
Use Lunarbits tokens for transactions on partnered e-commerce platforms and stores.

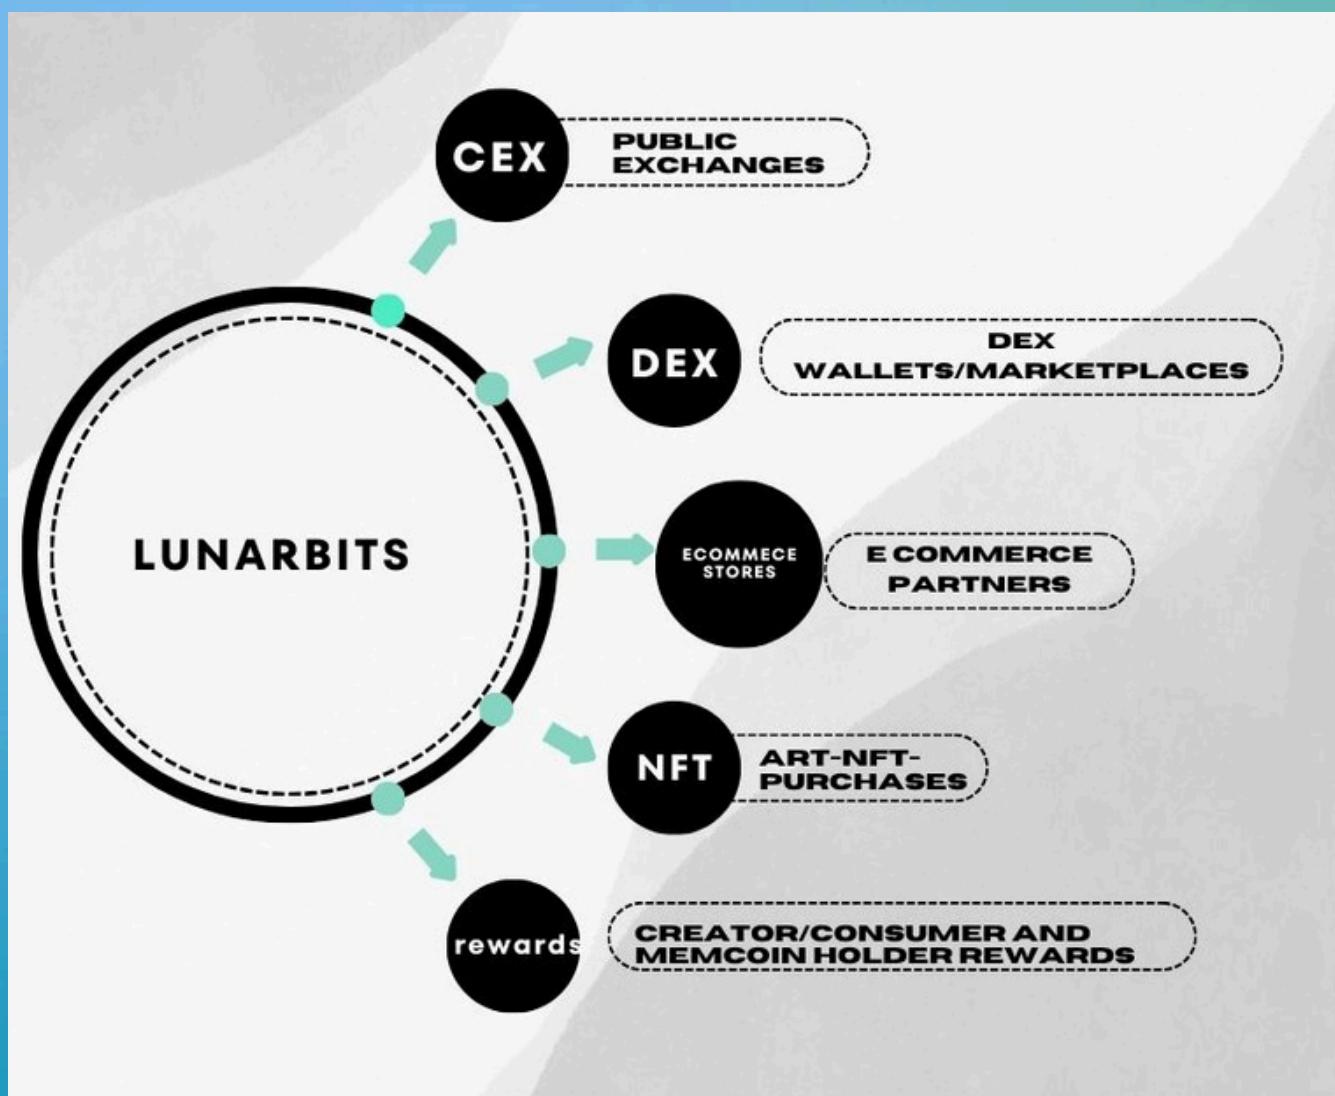

Integration with Commerce

- **Art-NFT Purchases:**
Buy art and NFTs with Lunarbits tokens.
- **Creator/Consumer Rewards:**
Reward creators and token holders within the ecosystem.
- **E-Commerce Integration:**
Enhance token utility through e-commerce store integration.
transactions on partnered e-commerce platforms and stores.

Benefits of Runes Ecosystem

Benefits:

- Minimizes on-chain footprint thanks to the UTXO-based model
- Simplifies the issuance of native fungible tokens on Bitcoin
- Its simplicity could promote innovation in the Bitcoin ecosystem
- Doesn't require off-chain data to operate
- Allows open minting within terms set by the etcher

Decentralized Autonomous Organization

A DAO is a blockchain-based governance model where decisions are made through consensus among token holders. It operates transparently and without a central authority, allowing participants to propose and vote on key decisions.

Lunarbits DAO Plans:

We plan to implement a DAO by 2025. Although details are currently limited, the DAO will enable community-driven governance and decision-making for Lunarbits.

DAO'S Benefits:

- **Enhanced Transparency:** All decisions and transactions are recorded on the blockchain, providing full visibility to participants.
- **Decentralized Governance:** Power is distributed among token holders, reducing the risk of centralized control and increasing fairness.
- **Increased Engagement:** Token holders can actively participate in governance, fostering a more involved and invested community.
